

SEAMLESS ROOFING MEMBRANES

Aqua  **Fast**

Aqua-Fast Seamless Roofing Membranes

have all the waterproofing and energy saving properties of single ply roofs along with the added benefits of being fully adhered and completely seamless. Also setting it apart from the competition, the Aqua-Fast technology can boast over 20 years of proven roofing performance.

Since it is sustainable, an Aqua-Fast roof will keep a building watertight for the remainder of its life.

Aqua-Fast Metal Roof Solutions

As metal roofs age, they begin to deteriorate due to normal weathering and corrosion. As gaskets fail, fasteners come loose, allowing panels to move and leaks to occur. Our manufactured-in-place systems are designed to stop this mechanism of failure and restore the roof to an even better than new condition.

Aqua-Fast Seamless Membrane Solution

Our Seamless Roofing Systems offer all of the positive benefits, being monolithic, highly reflective and sustainable while still being very easy to maintain. Aqua-Fast is a state of the art system of primers, reinforcing fabrics, base and topcoats. Incorporating these into a system will extend the life of the existing roof for the life of the building.

Performance

Watertight	Keeps the water out of your building.
Durable	Durable Aqua-Fast Membrane utilizes some of highest performance components available today, maximizing resistance to dirt, roof traffic and storm damage.
UV Resistant	Unlike traditional roofing systems an Aqua-Fast Seamless Roof Membrane has a surface that is designed for even the harshest UV conditions.
Seamless	Because our systems are manufactured in place, seams, the major weakness of most membrane systems, are eliminated.
Light Weight	Very low impact on your overall roof weight load.
Fully Adhered	Contributes to excellent wind uplift performance.
Wind Uplift	Only membrane with unlimited wind resistance.
Breathable	Trapped moisture in your existing roof system will pass through the membrane.
Highly Heat Reflective	Dramatically improves occupants' comfort by typically cutting a summer roof surface temperature by 50-90 °!!
Corrosion	Everest has systems designed to drastically reduce corrosion.
Resists Dirt	Excellent long term resistance to dirt accumulation.
Disruption Free	Installation is completed with no disruption to building occupants.
Extends Building Life	Cool roof surface will reduce expansion and contraction stresses on your building.
Looks Like New	Aesthetically pleasing final appearance.

Savings

Energy savings	Reduced solar heat gain will cut summer energy costs by up to 30%.
No Tear Off	Typically no costly tear off required.
Air Barrier	Many membrane roofs act as bellows by actually pumping out conditioned air and bringing in outside air. A fully adhered Aqua-Fast Seamless Roof Membrane will not.
Low Cost	An Aqua-Fast Seamless Roof Membrane keeps more money in your pocket compared to built up and single ply roofs.
Low Life Cycle Cost	With no tear-off and by simply maintaining the protective surface coating on your roof every 10-15 years, your roof can last indefinitely.
Rebates	Many local and federal rebates are available.
Tax Benefits	An Aqua-Fast Seamless Roof Membrane can often be fully expensed in the year of installation.

Environment

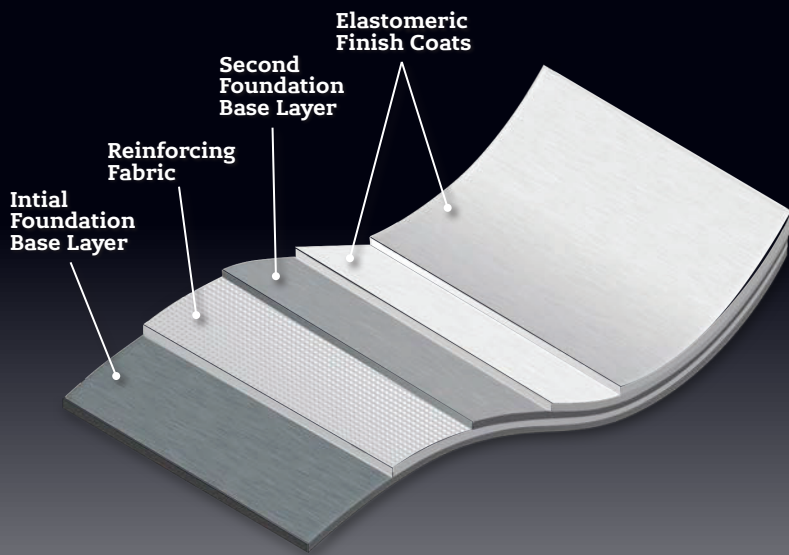

No Tear Off	Typically no need to remove roof and fill our landfills with roof waste.
Waterbased	Non-hazardous, non-flammable and easy cleanup.
Low VOC	Meets the most stringent VOC requirements in the U.S.
Low Odor	Can be installed in situations where rooftop air handlers cannot be turned off.
Sustainable	Simply maintaining the protective surface coating on your roof every 10-15 years, your roof will last indefinitely.

Aqua-Fast is ideal for all roofing applications

Everest Systems has a selection of the highest-performance, cost-effective, sustainable roof waterproofing systems available that will keep your building dry and leak-free for the life of the building. These renewable systems are custom installed to meet your specific needs. Once installed, your new roof will be a monolithic, water-tight membrane.

An Aqua-Fast System is excellent for:

- NEW CONSTRUCTION
- EXISTING:
 - METAL
 - BUILT-UP
 - TPO
 - EPDM
 - PVC
 - MOD-BIT
 - CONCRETE
 - WOOD

ProGuard Group boasts over 30 years experience in elastomeric polymer coatings industry. This experience and our focus on quality allows us to provide effective solutions for any roofing application, no matter how unique, and you can be sure your roof will perform for many years.
