

Labor & Material Warranty Pre-Approval Request Form

This warranty is only available for Authorized Applicators

Return form to roofwarranties@momentive.com

Planned Project Start Date		Planned Project Completion Date	
----------------------------	--	---------------------------------	--

Term Requested: 10, 15 or 20 Years	
Building/Project Description	
Street Address	
City, State, Zip	
Property Contact Person Name	
Property Contact Person Email & Phone	

Roof size (In Square Feet)	
Building Use	
Number of Buildings	
Coating Used	
Coating Color	
Total Gallons to be used for this project	
Will Solar Panels be installed?	
How do you access the roof? (If external ladder, what length?)	

	Authorized Applicator	Building Owner
Company Name		
Contact Person		
Street Address		
City, State, Zip		
Email Address		
Phone Number		

Will the coating application be applied by your company employees? Yes or No If no, please list who will be installing the coating.	
----------------------------------------------------------------------------------------------------------------------------------------	--

Distributor Name and Contact Person	
Distributor Contact Phone and Email	

PRE-JOB EVALUATION CHECKLIST

The purpose of the Pre-Job Evaluation is to identify the conditions of the roof deck, assembly and exposed substrate to help determine if the roof is a viable candidate for restoration with coating.

Date of Pre-Job Evaluation	
----------------------------	--

DESCRIBE THE EXISTING ROOF ASSEMBLY FROM THE TOP DOWN:

	AREA 1	AREA 2 (IF DIFFERENT)
Exposed surface material		
Insulation or cover board		
Prior membrane or surfacing		
Insulation or cover board		
Roof deck material		

ADHESION TEST RESULTS:

Substrate/Test Patch #1

Substrate	Test Patch #1 (Pounds)	Test Patch #1 (Width of Fabric)

Substrate/Test Patch #2

Substrate	Test Patch #2 (Pounds)	Test Patch #2 (Width of Fabric)

Substrate/Test Patch #3

Substrate	Test Patch #3 (Pounds)	Test Patch #3 (Width of Fabric)

Additional Adhesion Test
results/comments

PLANNED ROOF PREPARATION: All fields are mandatory (Use “N/A if needed).

PLANNED ROOF PREPARATION	AREA 1	AREA 2 (IF DIFFERENT)
Exposed Roof Surface		
Defect repair-describe defects and repair methods		
Cleaning (products, method)		
Description of detail preparation (Examples: fasteners, curbs, skylights, drains, scuppers, transition)		
Seam treatment (if applicable)		
Primer/Bleed Blocking basecoat (list)		
Coating Application: Method (spray, roll) Number of coats Wet mils per coat		

How old is the building?	
How old is the exposed roofing material?	
What is the estimated roof slope?	

ALL FIELDS ARE MANDATORY – USE “N/A” IF NEEDED

CONDITION	CHECK IF YES OR EXPLANATION	CHECK IF NO OR EXPLANATION
Moisture Survey?		
Method used to evaluate for Moisture. Upload file, photos and/or video or moisture scan report. If none, explain why no moisture survey done.		
Existing Leaks?		
If yes, identify on roof map and include interior and exterior pictures or video.		
Damaged Substrate?		
Describe type of damage and how it will be repaired.		
Ponding water?		
If yes, indicate on roof map and tell how drainage will be corrected.		

Previous repairs to membrane?		
If yes, indicate on roof map. If repairs were made improperly describe how they will be brought up to standards.		
Was the roof previously coated?		
Describe the existing coating, with type if known. If aluminized – a minimum of 90% must be removed. Describe plans to remove 90%+ of aluminized coating.		
If substrate is a Single Ply membrane, how is it attached to the roof? (Use N/A if applicable).		
Damaged Roof Top Equipment?		
If yes, identify on roof map and include pictures or video.		
Damaged flashing, coping cap, drip edge or other metal flashings		
If yes, identify on roof map and include pictures or video of damage.		
Are there parapet walls?		
If yes, state height, type of construction, condition of exterior and interior and how top will be finished. Also include pictures or video of all wall areas.		
Internal or external gutters? Are they in working order?		
If yes, include pictures or video of the entire gutter area.		

Are there roof drains? Are they in working order?		
Are AC unit condensation lines plumbed to drain or gutter?		
If no, describe plan to keep water off roof during installation of coating and to properly drain afterward.		
Are there scuppers?		
If yes, identify on roof map and include pictures or videos of condition of scuppers.		
Are there areas of poorly adhered existing roofing membrane (seams, field, roof termination)?		
If yes, identify on roof map and include pictures or videos.		

FOR METAL ROOFS ONLY

CONDITION	CHECK IF YES OR EXPLANATION	CHECK IF NO OR EXPLANATION
Describe the condition and location of closure strips or plans if none are present		
Is deflection of panel overlaps (both vertical and horizontal) or ridge cap seams, less than 1/4" ?		
If greater than 1/4" how will they be brought tight?		
Are there skylights?		
If yes, describe condition and identify on roof map and include pictures.		
On standing seams, are mechanically crimped seams closed and tight?		
If no, describe how seams will be repaired.		

Are there missing or loose fasteners?		
If yes, what remedial actions will be taken?		
Do any panels need to be replaced?		
If yes, identify on roof map and include pictures or videos.		
Note whether any rust is surface or structural?		

ADDITIONAL MANDATORY REQUIREMENTS:

- Submit photos of that show field of roof, edge, walls, rooftop equipment.
- Submit roof map noting locations of: adhesion test locations, core and cut evaluations, roof top equipment, skylights, roof hatch or access point and signs of ponding water.
- If there is any conflict between Momenitive specifications or requirements and the project specification, attach a copy of that portion of the project specification.

Applicator grants Momenitive permission to utilize the photographs submitted with this request for commercial purposes in publications including, but not limited to, training materials and web-based publications without payment or other consideration. Applicator certifies that the building meets the requirements for a coating application, adhesion tests were performed and meet or exceed minimum pull resistance and information on this Request is accurate. Installation will be done in accordance with current Momenitive specifications to obtain a Labor & Material Warranty.
