FIBERSIL PRO 3000

High Solids UV-Resistant Fibered Silicone Repair

ProRoof FiberSil Pro 3000 is a high-solids, moisture-cure silicone repair compound engineered to provide long-lasting repairs on commercial roofing systems. Its fiber-reinforced formulation delivers exceptional adhesion, flexibility, and weather resistance, making it ideal for restoring damaged roof details before a complete coating application.

WHY CHOOSE FIBERSIL PRO 3000?

- **FIBER-REINFORCED STRENGTH**

High-solids silicone reinforced with fibers for durable, long-lasting repairs.

- **SUPERIOR ADHESION**

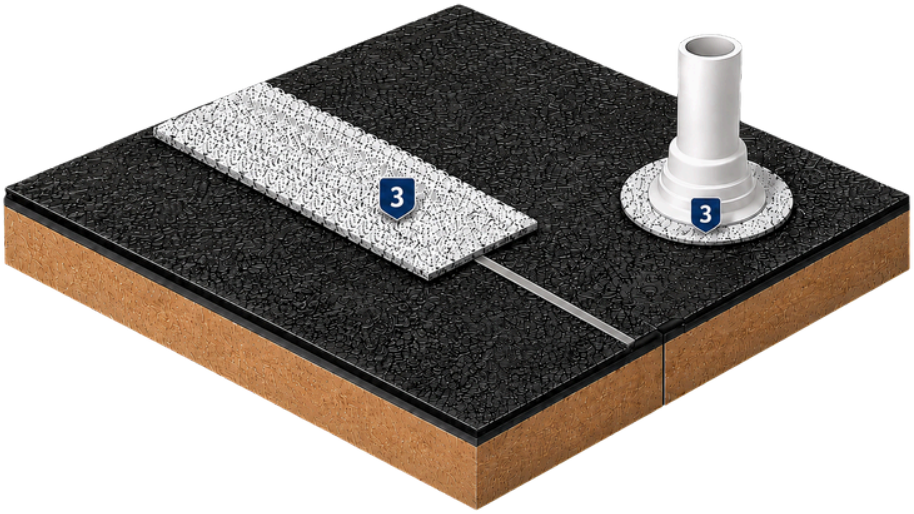

Exceptional adhesion to weathered and unprimed roofing substrates.

- **HIGH MOVEMENT FLEXIBILITY**

Maintains flexibility to accommodate roof movement while resisting cracking and splitting.

- **UV & WEATHER RESISTANT**

Engineered to withstand prolonged UV exposure, standing water, and harsh environmental conditions.

IDEAL FOR COMMERCIAL ROOF RESTORATION

FiberSil Pro 3000 helps restore roof details, seams, penetrations, and damaged areas before installing a complete restoration system.

STEPS OF APPLICATION:

1. Prep Surface
2. Clean and Dry
3. Apply FiberSil Pro 3000

Can be applied to damp surfaces in emergency repair

THE PROFESSIONAL CHOICE FOR SILICONE REPAIRS

KEY FEATURES:

- High-solids silicone formulation
- Fiber-reinforced for added strength
- Single-component, ready-to-use
- Moisture-cure technology
- Superior adhesion to damp/wet surfaces
- Excellent crack resistance
- Outstanding UV resistance
- Long shelf life (up to 6 months)
- Water-resistant yet breathable
- VOC Compliant

TECHNICAL INFORMATION:

STANDARD COLORS: White, Light Grey
CONTAINER SIZES: 1, 2 & 5 Gal Pails
VOLUME SOLIDS: 90%
WEIGHT SOLIDS: 91%
ELONGATION: 468%
TENSILE STRENGTH: 205 PSI
VOC: <50 g/L
COVERAGE: 1 Gal / 100 sq. ft.
SEAM APPLICATION: 3 Gal/SQ (48 Wet Mils)
TACK-FREE TIME: 20–30 Minutes
COMPLETE CURE: 48 Hours
TEMPERATURE RANGE: -80°F to 350°F
SHIPPING CLASS: 55

COMMON APPLICATIONS:

- Roof penetrations
- Flashings
- Seams and transitions
- Fastener encapsulation
- Roof repairs before restoration
- General waterproofing repairs

PAIR WITH COMPLETE PROROOF SYSTEMS

FiberSil Pro 3000 is commonly used as the repair component before installing ProRoof acrylic and silicone restoration systems, helping create a stronger, longer-lasting waterproof roof assembly.

RESTORE WITH CONFIDENCE.

Choose ProRoof FiberSil Pro 3000 for professional-grade repairs that deliver exceptional adhesion, flexibility, and long-term weather protection.
