# SAFETY WALK PAD 7000

Pre-Cured Silicone Safety Walk Pad

**ProRoof Safety Walk Pad 7000** is a high-quality, pre-cured silicone walk pad designed to create designated pedestrian pathways across silicone-coated commercial roofs. Installed directly into wet silicone coating, the walk pad becomes fully adhered to the roof surface while providing a durable, high-visibility path for rooftop maintenance personnel.

## WHY 7000 SAFETY WALK PAD?

- **High Visibility, Safety Yellow**

Creates clearly designated walking paths for rooftop personnel.

- **Pre-Cured Silicone Construction**

Provides a durable, flexible surface engineered for demanding rooftop environments.

- **Fiberglass Reinforced**

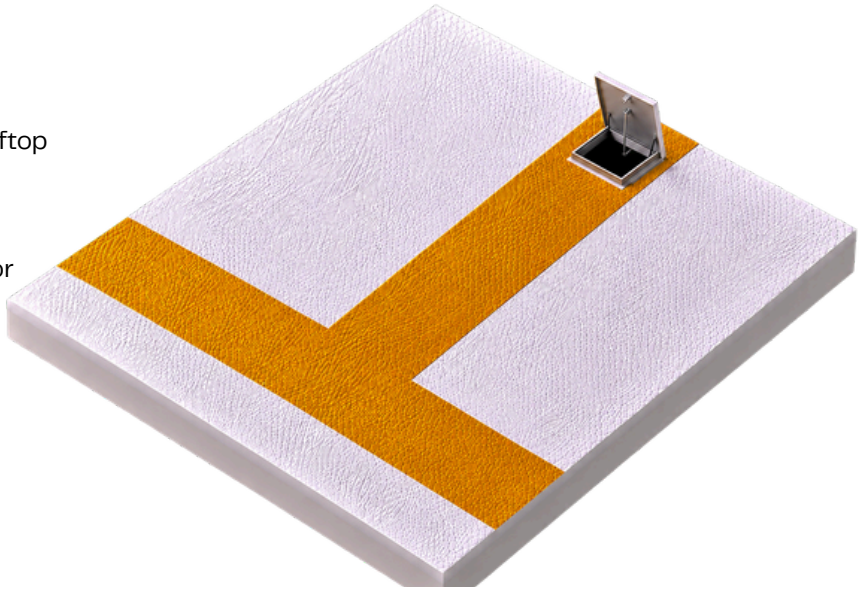

High-quality silicone reinforced with fiberglass for added durability and puncture resistance.

- **Excellent Flexibility**

Designed to remain flexible even under harsh climatic conditions.

- **Silicone Compatible**

Fully compatible with alkoxy-based silicone roof coatings and accessories.

## STEPS OF APPLICATION:

1. Apply Silicone
2. Position the Walk Pad
3. Embed & Adhere
4. Create the Path

# PROTECT YOUR ROOF. DESIGNATE THE PATH.

## PLACES OF USE:

- HVAC Equipment
- Rooftop Mechanical Units
- Service Areas
- Roof Hatches
- Access Ladders
- Frequently Serviced Equipment
- Designated Maintenance Routes

## WHY ITS NECESSARY:

Commercial roofs often require routine access for HVAC technicians, maintenance crews and facility personnel. ProRoof Safety Walk Pad 7000 provides a clearly identifiable walking surface that helps direct pedestrian traffic along designated routes instead of allowing unnecessary traffic across the entire roof system.

## TECHNICAL INFORMATION:

- PRODUCT: ProRoof Safety Walk Pad 7000
- MATERIAL: Pre-Cured Silicone / Fiberglass Reinforced
- COLOR: Safety Yellow (Custom Colors Available*)
- SIZE: 1 m × 50 m (3.2 ft × 164 ft)
- PACKAGING: 1 Roll
- PALLET QTY: 20 Rolls
- SHIPPING CLASS: 55
- *MOQ applies to custom colors.

## THE SMART DECISION

ProRoof Safety Walk Pad 7000 provides a durable, highly visible solution for directing rooftop foot traffic while maintaining full compatibility with silicone roof restoration systems.
